Re: WT Docket No. 19-71
Proposed Expansion of Over-The-Air
Reception Devices Rule

Dear Ms. Dortch:

Ionia Unlimited, LLC is a wireless internet service provider (WISP) serving rural Ionia County, MI and surrounding areas. We support the proposed changes to the Commission's Rule pertaining to Over-The-Air Reception Devices (OTARD Rule).

Modifying the Rule to allow the placement of small broadcast devices at a customer's property would allow WISPs to provide high speed broadband services to customers that currently can not be reached by other means due to terrain or vegetation. Zoning and landlord restrictions prevent the installation of equipment that would allow the relay of fixed wireless signals to nearby residents.

The proposed changes would improve the ability of service providers to provide affordable high speed internet access to a greater number of under-served customers. We hope that the Commission will take this step to help providers bring Rural America the connectivity they deserve.

Sincerely,

Keith Merryfield and Adam Plett
Owners of Ionia Unlimited, LLC
